- hand-picked grapes
- transport of the harvest in open-sided bins of 45kgs to eliminate any damage to the berries
- airbag presses
- must obtained on the basis of 100 litres of juice from 150kgs of harvest: 75% first pressing, 25% second or later pressings
- both yeast and malolactic fermentations carried out, blending of separately-made wines, then preparations for bottling that is carried out after January 1st
- extended maturing, 16 months on average, bottles inverted on racks in the unvarying natural cool and half-light of the underground cellars hewn out of the limestone bedrock. It is during this period that the wine's natural sparkle develops
- two-stage certification by the INAO (Institut National de l'Origine et de la Qualité): first the base wines, then the finished wines off the racks.

Our wines, sprung from the bedrock yet finely chiselled, carry one away with their intense, truly mineral freshness...
